EXPERIENCE

UI/UX Designer | Digital Harbor Bolivia   June 2023 – Present (Bolivia – La Paz)
Software development company.   Figma | Adobe Illustrator
                                                                            UserTesting | Moqups | Maze

- Conducting thorough user research to understand the target audience, their needs, and pain points, ensuring designs are user-centric.
- Creating wireframes and interactive prototypes to visualize and iterate on design concepts before final implementation.
- Conducting usability tests to gather user feedback, identify usability issues, and refine designs for a seamless user experience.

Chief Technology Officer & Founder | Menti Academy   Dec 2021 - Present (Bolivia – La Paz)
The platform that makes learning online fun for kids   Leadership | Team Management |
                                                  Technical Expertise | Technology Innovation | Strategic Decision

- Online academy for technology and science education for children, emphasizing hands-on learning through experimentation and creation.
- Inspiring a passion for technology and science, fostering curiosity, and creativity in a safe and stimulating online environment.
- Wide range of online courses tailored to individual students' needs, led by highly trained instructors dedicated to providing a meaningful and enjoyable learning experience.

PROJECTS

Abya Yala | ActInSpace Hackathon   Aug 2020 - Dec 2020
Global finalist of ActInSpace Hackathon 2020.

- An indigenous agricultural platform using AI for satellite image analysis combined with ground hardware to achieve the goal of Zero Hunger.
- The website was instrumental in winning the hackathon, and it was also recognized for having the best design.
- Our team utilized innovative tools such as artificial intelligence and robotics to develop a unique solution for the hackathon.

Agronomito Infobase | Miga Bolivia   Jun 2020 – Jul 2020
Website of the State Procurement System

- Collect data from the State Contracting System (SICOES) website and present it in an easily understandable and quick-access format, providing updated national calls of interest to the producer.
- Agronomito infobase can filter information to show current and expired requirements, enabling producers to stay informed about their contracts.
- Establish a large network of contacts for businesses, including suppliers and consumers, to facilitate interaction and product exchange.
